## Guidelines To Join Facebook Groups:

You may be wondering, that is simple to join, it only takes a click to the join button, that's right, but to get the good desired results and keep your account safe there are some guidelines you should pay attention to.

Now that you've got the list of the top groups, you should be excited and probably you're going to try to join all of them as soon as you can right? Please don't, this may eventually get you in trouble if not done properly. In fact Facebook is very strict when it comes to groups joining and posting, even if you have good attention they may restrict your account for a while if you don't do things the right way.

So please pay attention and read what I'm sharing with you in this guide carefully to save a lot of time and avoid headaches.

### **Best practices to join a large number of Facebook groups fast:**

From my testing join no more than 10 to 20 groups per day, not in a roll, you have to disperse your actions throughout the day. For example:

**Day one:** Join 3 groups the morning, 4 at midday, 5 the afternoon and 5 in the evening.

**Day two:** Join 4 groups the morning, 3 at midday, 7 the afternoon, and 5 in the evening.

And so on, until you have joined all the groups you want to join. Also Make sure you wait at least a couple of minutes between each join.

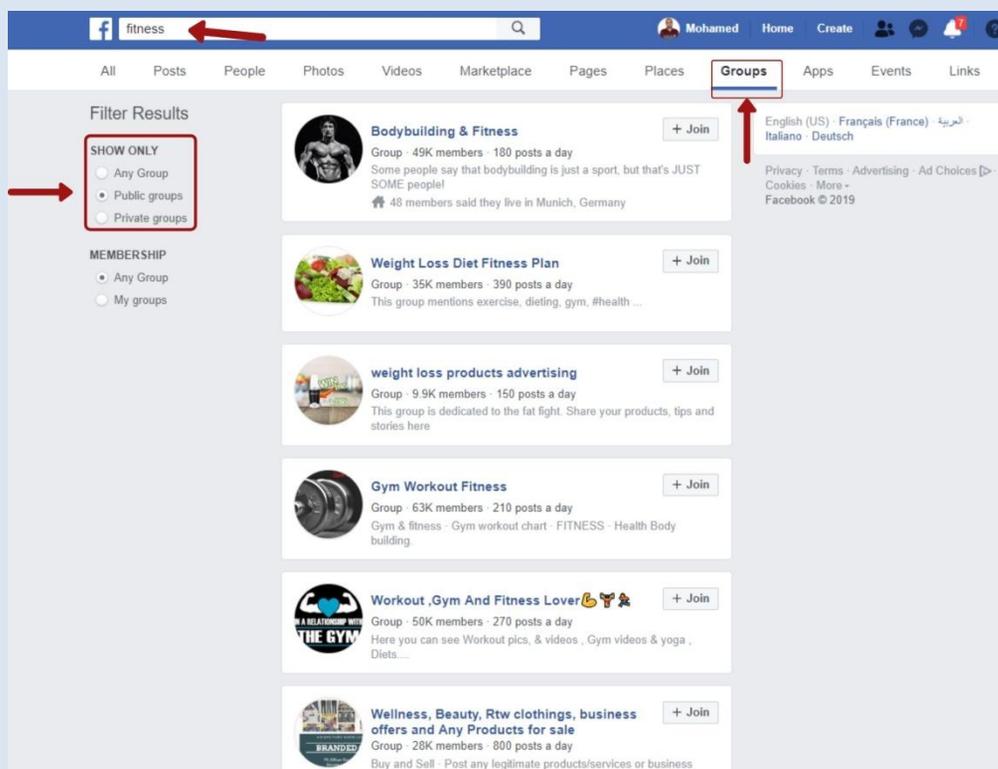

You should answer admins questions if you got asked any when you hit the join button because most of them will disapprove your request if you don't.

## How To Find The Best Facebook Groups For Your Business:

You may have a very specific niche and want to find more groups related to your business topic.

For that you have a very useful tool, it's Facebook search bar. Let's suppose you're into the bodybuilding niche, first start by finding some keywords related to your niche, in this example this will be Fitness, musculation, gym, workout....

Each time type a keyword and chose groups in the menu up like shown on the illustration below:

You can join the public groups or private one, from my testing both works well, yet you will need to test and see which groups perform the best for you and focus your marketing efforts on them.

## How To post In Groups- Best practices:

As I told you before Facebook is a bit strict with the amount of actions you perform. As joining and posting in groups. If you don't take good precautions and practices you may end up facing some issue and wasting time even if you respect Facebook's guidelines.

You're lucky enough to read this guide As I will save you a lot of frustrations, while showing you exactly how to maximize your outcome from your Facebook account without facing issues.

1. If you're planning to post the same post in many groups better use some variations not post the same post word per word in all of them, this will avoid your post been flagged by Facebook Algorithms as spam.
2. Don't be aggressive. Delay between each post. If you go too fast you risk been restricted from posting and joining groups.
3. Instead of posting the same post in a group better Bump it. To bump a post you need to save the post URL then later on, comment on it. Each time you Bump a post this will bring it to the top of the group, which means more eyes on it. The best part is, each time you bump a post this will make it stay longer on the top and you can do it as long as want even for years. After commenting "bumping" you can delete the comment to keep your post clean.
4. Use videos and images as much as you can, because Facebook give them more juice to stay on the top and appear on the feed.
5. Post on your wall or business page and share it on groups instead of posting it over and over again.
6. Use calls to action as comment below or like this post to get more interactions and stay longer on the top.
7. Take a break From posting in groups for a day or two per week.

## Connecting With The Community:

One of the best ways to take full advantage of being part of a Facebook group is by interacting and connecting with other members and to do so you can:

1. Like their publication.
2. Comment relevant comment to their posts.
3. Send them friend requests.
4. Ask them questions.

5. Answer their questions.
6. Write helpful and relevant content.
7. Start a conversation with them

## Marketing Attraction:

Attraction Marketing is a skill that every successful Marketer have or should master, all what you do must be in the spirit of making your target audience do what you want, in other words, your call to action.

Sharing value and helping others is the best way to attract your potential customers. I go more in deep on this in my E-book that I'm willing to share with you for free if you're brave enough to read this guide till the end.

## Grow Your Business Page using Facebook Groups:

Now you can join a group as a page, if you have a Business page that you want to grow one of the quickest free shortcuts, is by joining groups as page and do what we shared in this guide as a page.

If you focus on sharing value and you interact with the spirit of being helpful to the community, you will be amazed how exponentially your page will grow.

And here is one of my well kept secret: let's suppose you posted a post on your Facebook page, then you started sharing it in some groups. Some people like it and started sharing it in other groups with their friends and so on... Now this post has gone viral. You're getting a lot of traffic for free and massive exposure. Did you know that if you use Facebook ads to boost a post like this one you can reach a lot of people for pennies really nothing, comparing to a post that has got little or no engagement at all. This is one of my best strategies to get even more traffic for NADA.

## Pinned Post And group banner Advertising:

Another great way to get massive exposure, traffic... For little investment. I use it myself and it works very well each time.

The group banner and pinned post is a good place to get a lot of eyes on your post/offers... Yet if you're not the group admin you have no control over them.

Fortunately most of groups admins are open mind and use this method to Monetize their groups, just reach out to the admins of the groups that interest you and negotiate with them.

There is no Rules here, you should try to get the lowest price possible.

As a reference for you, recently I got a post pinned on a group of 38k member the whole week for only 20\$.
