# Fast Track to Wealth: What you Have to Know to Make Money Online Like a Pro

## About the Author:

My name is *Mohamed Rida Tebbai*, I'm a digital marketer and online entrepreneur. I specialize in Leads generation, social media marketing, email marketing, Search Engine Optimization (SEO), copywriting and online advertising. I'm sharing top notch information in this E-book that will save you a lot of time and money. I learned the hard way and I know exactly how it feels when you're struggling to make money online while others are banking millions, so I decided to show you in a simple, easy way, exactly how it's done, and how you can skyrocket your actual online business if you already have one or build a profitable one from scratch.

Please Save this E-book as this will be your guide to wealth. Finally, before we start you should note that the market is always moving and you have to stay ahead of your competition, so, don't forget to subscribe to my newsletter, you will get the latest updates and tips to stay on the top of the game.

[Subscribe To Newsletter](#)

## Introduction:

**Making Money online** has never been easier, in fact years ago after the *dot com bubble*, only a few elites of technical guys and some early bird **affiliates marketers** with high level marketing knowledge were able to make fortunes in this new industry.

Now it's very different, virtually anyone with an internet connection can **build huge income from anywhere around the globe**. Yet in reality not everyone will make it and only a few will be able to build real **wealth**.

Now you should be asking yourself if it has never been easier why not everyone will be able to get there and you're right, this is a good question and there are many reasons, but the most common is the lack of information and/or not been able to develop and learn the right skills. But there is another important question, Which is **How to Make Money Online Like a Pro**, and this is exactly what we are going to answer in this E-book the **HOW**.

## 3 Keys to business success & wealth:

Building a business requires resources, ignoring any of these three keys will highly increase your chances of failing, and anyone who told you, you don't need one of those to build wealth is trying to fool you. In fact to take out your business from the ground or to start a profitable one you need, **Information, Time & Money**. Let us now explain deeply why you need this 3 resources.

### 1. Information:

As we said in the introduction most people fail online fault to lack of the right information and knowledge.

Running a business requires having some specific knowledge and skills, you should develop the ability to learn but most important you must find a reliable source to get good accurate information that will save you time and get you on track asap.

What I have learned from years of doing business online: The best way to find good information and learn the knowledge to get wealthy, is by finding a person "mentor" who already good at what you want to do then learn from them.

If you want to be wealthy never take advice from broke people their recommendations will cost you a lot. Instead find someone who is already making it and learn from him, better if he accepts to mentor you, this is your best shortcut ever.

### 2. Time:

This is the most costly resource ever you have to use it wisely. As an entrepreneur your most valuable investment into your business is your time. Dedicating enough time and time management is part of your responsibilities.

The great news: you can buy more time and get things done even faster using your 3th key resource.

### 3. Money:

Oh yes money is the fuel, as much as you put into the business as far as you can go, but don't get me wrong here throwing money or just having it will not get you there, you must make good decisions and invest in the best solution to get the wanted outcome on the short, intermediate and long run.

Below a list of the best things to invest your money on as a business owner:

- **Education and self Development.**
- **Marketing and Advertising.**
- **Outsourcing and Delegation.**

And what if you have no money at all? Many will stop here and continue their miserable existence. Not you, you're lucky enough to read this E-book & you got the most worthwhile resource, Time, which is far-ways more valuable than money. Invest it wisely to learn and find the right information, sell it to make money and build up from there, by investing a part of what you earn in the areas that will get you rich.

I could stop here as what I shared with you at this point will put you on track to wealth, but I was blessed enough and I want to give a bit back by sharing with you the first key the "Information" or in other words a simple guide on how to build or explode an online business in any niche in 3 simple steps. So you don't have to search a lot and waste a lot of time and money as I did.

## Steps To Business Domination- The Power Of 3:

Money is Made when a problem is solved and there is no exception here, you should have a product or/and services that solve a specific or certain problem/s, put it in front of the right audience that need it then make sure they want to purchase it from you. You may already have a product or service, don't worry, just keep reading the best is to come.

Yes, as simple as that, yet you may be asking what if I don't have a product or service? There are tons of great products and services out there that you can pick and become an affiliate with, just keep reading I got you covered too.

Now let us dive into the steps to build a successful online business and bank fat cheques month after month and live the life of your dreams.

Before continuing I want to congratulate you, you're ahead of 95% of people who should already gave up on reading, please take a deep breath and realize how lucky you are to get all these information in this Ebook, for myself and some folks it took years to figure it out, we learn it the hard way so please take it seriously and If you want to thank me, simply apply what you learn here and become a success story.

## 1. The Lead Magnets: Customer Attraction

Now that you have a great product or service that many potential customers needs, you should realize sooner or later that competition is tough, there are thousands of marketers in the marketplace selling the same products/services. Most young entrepreneurs and startups get discouraged fast and will end up giving up before seeing any breakthrough.

Competition could seem like a bad thing, but it's healthy for the marketplace and should be interpreted as an indicator of good Market with huge potential of profits. In fact a lot competitions means a lot of cash in the market, and you can get your part of it if you apply what you will learn on the following.

The only way you are going to make it, is by distinguishing yourself from your competitors.

Providing value, and been a trusted source of useful information is one of the best ways to establish an authority in your niche and position yourself as an expert.

The first impression count and you must make your future/potential customers get the best experience in the first contact with you/or your brand. You Should make him want to hear more from you in a way that he will gladly give you his contact or want to connect with you.

Attraction Marketing is a skill that every successful Marketer have, all what you do must be in the spirit of making your target audience do what you want, in other words, your call to action.

To make it clear for you here are some examples of proven high converting Lead Magnets:

- *OFFERING E-BOOKS THAT HELP SOLVE A PROBLEM*
- *GIVING FREE CONSULTATIONS*
- *GIVING FREE TRIALS AND SAMPLES*
- *GUIDE TO DO SOMETHING*
- *GIVEAWAYS*
- *CASHBACK & BONUSES*
- *CASE STUDIES.....*

In the resources section I will be sharing a good way to go about lead magnets and create them fast even if you're a complete beginner.

## 2. Traffic: Leads Exposition & Generation

What I love the most in this E-book is this part, Mastering it, is like having a machine that prints you money on demand.

Having a good product is a nice thing, been able to make the best top performing lead magnets on the planet is awesome but without having the ability to find your audience and position your offers in front of it, is like having a store on the desert. You will end up chasing the mosquitoes, well, if you find them.

Traffic is the lifeblood for any business, as a business owner you have to make sure a consistent volume of traffic is flowing regularly, and not only that, in reality you need to the right traffic.

Targeting is the key, if you're selling anti aging products for example, putting your adverts in front of young people is not a good idea or if your company is delivering only in north america advertising to european is a waste.

I do not want to overload you with information that will end up confusing you, so I'll have to be precise.

There are tons of ways to get traffic, I'll be sharing the most effective ones that works well for me and for all kinds of online businesses.

## **Paid Traffic:**

- **Facebook Ads:**

My Favorite one because the targeting is the most effective of all and this works even for the hardest sous niche where the audience is quite limited.

- **Google Ads:**

This is the most cost effective as the targeting here is by keywords which make you get visitors ready to take action. If done right the RIO should be very high.

- **Solo Ads:**

What I love about Solo ads is you're getting the most responsive person from other marketers lists, means action takers which is awesome. This work for most popular niches. if you're not experienced in paid ads is the way to go.

If you can afford it right away, Paid Traffic is the easiest and fastest way to get rolling, start small do some split testing until you find a winning formula then scale up from there and don't hesitate to take advice from experts.

Each product, Market have its particularities, The only rule is to test and test again until you find your positive RIO, then optimize and optimize again to maximize your profits.

## Free Traffic:

- **Social Media:**

This the way to go when you have a limited budget, you can invest your time instead to get free traffic:

### **FACEBOOK:**

With over 2.375 billion monthly active users and 1.49 billion daily Facebook is so far the best place to position yourself/Brand and your product in front of your target audience, and to do so the fastest easiest way is by joining communities related to your niche and posting high engaging valuable content to connect with your target audience,interact, build trust and relationships.

### **INSTAGRAM:**

The simplicity of Instagram makes it so powerful to market your business efficiently and rapidly. Posting high Quality content related to your niche is the key and to get going you need to interact "Follows, Likes, Comments" with your target market by searching for it by keywords, hashtags and the audience of influencers in your niche.

### **YOUTUBE:**

The To most effective way to build long term high quality traffic targeting keywords which makes it high converting, The only downside, it takes time to see results and you have to know how to make videos.

Investing time and money to build a presence on Youtube, really worth it, mastering video marketing is the key to massive success online.

### **LINKEDIN:**

Is mainly used for professional networking, including employers posting jobs and job seekers posting their CVs, if your business is a B2B model or you've offers like network marketing opportunities don't neglect LinkedIn.

You have access to communities and group and can connect with people who match your targeting criteria very quickly, you can build your profile to position yourself as an authority in your niche.

There are several other social media and channel as **Twitter,Pinterest** and **Tumblr**, they can be very effective as well, you can try them, and here are the rules you must follow to become a successful social Media Marketer:

1. Focus On High Quality Content.
2. Share Value.
3. Interact with your audience.
4. Focus on one media at once until you build it up then move to the next.
5. Connect With influencers in your niche.
6. Be consistent.
7. Think out of the box.

- **SEO:**

Search engine optimization is the fact of ranking on google and other search engines on the top of searches for certain keywords, in other words when someone search for something on Google your website or Blog article come up in the top results and you get a good volume of high quality targeted traffic for free.

The down side: this take time to rank a website and need to invest a lot of resources (time & money).

The great news is that You don't really need to implement SEO as a traffic generation method to make huge profits and build wealth on this industry but if you do, you will get one of the best traffic on the net absolutely for free and of course it's worth mentioning it in this E-book.

Traffic is the most difficult part where almost many online marketers struggle a lot, you have to focus in a couple of ways until you get the results you're looking for. In the resources section I will be sharing some shortcut to get traffic fast and easy even if you're a complete beginner with no experience in traffic generation.

### 3. The System: Conversion & optimization:

You're almost done, using already what I shared with you in the previous steps, can get you massive growth. In fact been able to To find and target your potential customers and position your brand/products/services in front of them while using attraction marketing and implementing the lead magnet process is what any business needs to thrive.

In this section, "step 3", we are going to discuss how you're going to maximise your profits without even having to work more, in fact you're going to work less. Sound Crazy Not? Just keep reading here you're going to learn how to multiply your income while working less. The secret is automation and to do this the right way you need 4 core things:

- **Website/Capture page:**

A landing page, sometimes known as a "lead capture page", "static page", or a "destination page", is a single web page used to get the lead information as email phone number name... in exchange of something like we had seen on the The Lead Magnets: Customer Attraction section.

It's an effective way to build a list of targeted leads, follow up with them anytime you wish to sell them your products and services and generate traffic to your actual and future offers on demand.

Making a landing/capture page is not a big task nowadays anyone can do it, also the cost is very insignificant, I will even share with you in the resource section the most cost effective and friendly beginner way to go about it.

- **Autoresponder/Email marketing:**

An autoresponder is a sequence of emails that are automatically sent to a specific segment of people on your email list, triggered by a specific event, such as joining your list, browsing behavior.....

This is your most powerful tool to automate the conversion, save time and make huge profits on autopilots.

Money is in the list I bet you already heard this, I was very septic when I heard it the first time but it's the truth MONEY IS IN THE LIST and the autoresponder is your tool to get this money out.

And don't worry this is very simple to set up and will share with you down below a place where you can learn this for free and become an email marketer expert in no time.

- **Traffic/visitors to your website:**

The more traffic to your website, the more opportunities you have to generate qualified leads, to nurture and help solve their problem and ultimately sell your product or service, gain a new customer or client, and continue to grow your business.

When you start out on the web with an online business, the importance of website traffic can be vague. However, it's important to realize that the success of your business depends on it.

We have already seen many sources you can develop and use on the Traffic: Leads Exposition & Generation section. I will be sharing some good resources to help you with this important task down below. so just keep reading you're almost done and you will be on the right track to get massive success online.

- **Testing, Analysis & Optimization:**

Once you have your capture pages, your autoresponder and are able to drive traffic, don't expect to get all perfect from your first try, even if you are the luckiest human on earth, your system and marketing campaign will always need some tweaks and adaptation to the market changes.

Top Points to focus on:

1. Split testing your captures/landing pages, in other words, you should have many variations and test them and see which ones perform the best and keep them.
2. Same thing with email and emails headers, test many variations and see which ones have the best open rate and convert better.
3. Try various sources of traffic then see which one gets you great results.

In short You test many variations analyse data then optimize your system until you maximize your profits and restart the process over and over again. It's a never ending cycle as long as you're in business.

## Answering some questions and Eliminating Doubt:

At this point, you may still have a lot of questions and I'm going to try to answer some of the most common questions:

1. All this stuff sound complicated for me I'm not a technical guy and I think I can't do this?

You don't really need to be technical at all to do all what we have seen until now, anyone who can follow simple instructions can do this. of you course this will require from you to learn some new things and improve or develop new skills.

Also as an entrepreneur you should focus on what you're good at and outsource or delegate things you're not good at instead of wasting time on it. In the next section you will get all what you need to answer all your questions.

2. I don't have money to invest, what should I do?

If you're still asking this question you should read again the first section of this Ebook. If you don't have money you should go out and find financment either by selling your time on a daily job, by selling a skill you have online or offline or by selling other people products or services in exchange for commissions.

When you have the money you can start investing in your business, education and personal growth.

3. I'm lost I don't really know where to start?

It's hard to answer this question as everyone and every business has its particularity however you can reach out to me at [medrida@mlmgrowthtips.com](mailto:medrida@mlmgrowthtips.com), please send me as much details as you can regarding your actual situation and what do you want to accomplish; I will gladly study your case and try to help you out.

## Mindset and Self confidence:

The single most important factor influencing a person's success — whether personal or professional — is mindset. What you think about consistently has a direct impact on your behavior, and not the other way around. So, it's important to get this fundamental ingredient right.

A seemingly small thing that makes a huge difference, mindset counts for the primary distinction between those who succeed and those who do not. And, if you are serious about achieving success in any area of your life, you must learn to master yours.

In order to be a successful business owner in today's fast-paced world, talent, academia and qualifications are not enough. Above all, being confident in your work is crucial for career success.

Being confident in the workplace enables you to be proactive on demand, assertive and focused. Having true confidence not only allows you to have a positive impact at work, but it also helps you make choices that will benefit your whole life sides.

Sometimes you need to step out of your comfort zone to succeed. Here are 6 points to focus on if you want to build self-confidence:

- **Educating yourself, developing your skills and acquiring new ones**
- **Have a clear vision of where you want to be, set goals and target.**
- **Be positive and focus on solutions instead of problems.**
- **Take risks And Ditch doubt, by risk I mean calculated one.**
- **Be proud of your accomplishments & Recognize even the smallest ones.**

## Ressources:

This is the most important section of them all as here you are going to discover how to implement all what you have learned until here in a practical way:

## Get Response:

The most complete marketing automation tool I have used ever and I can assure that I tried tens of combinaisons and here is why I use and highly recommend them:
